

## SKÖLL & HATI – COCKTAIL ALLERGEN INFORMATION

*Please make the team aware of any allergen or dietary requirements prior to placing your order.*

*While we endeavour to provide full and accurate allergen and dietary information for all of our products, there may be occasion where producers have failed to provide full details of their ingredients or processes and it is up to you to decide whether you are comfortable consuming a product with the information provided.*

*Please also be aware that while we maintain high standards of cleanliness and make every effort to avoid cross contamination of ingredients, this cannot always be guaranteed.*

*Although the distillation process typically removes allergens from spirits, we cannot guarantee a 100% allergen-free environment during production. Customers with severe allergies are encouraged to exercise their own judgement regarding the suitability of distilled products for their personal needs.*

*If you are unsure whether it would be safe for you to consume a product, please make our team aware and we will endeavour to find you an alternative.*

*Thank you.*
